MARKET GARDENERS'

PRICE LIST OF

....SELECT....

VEGETABLE SEEDS

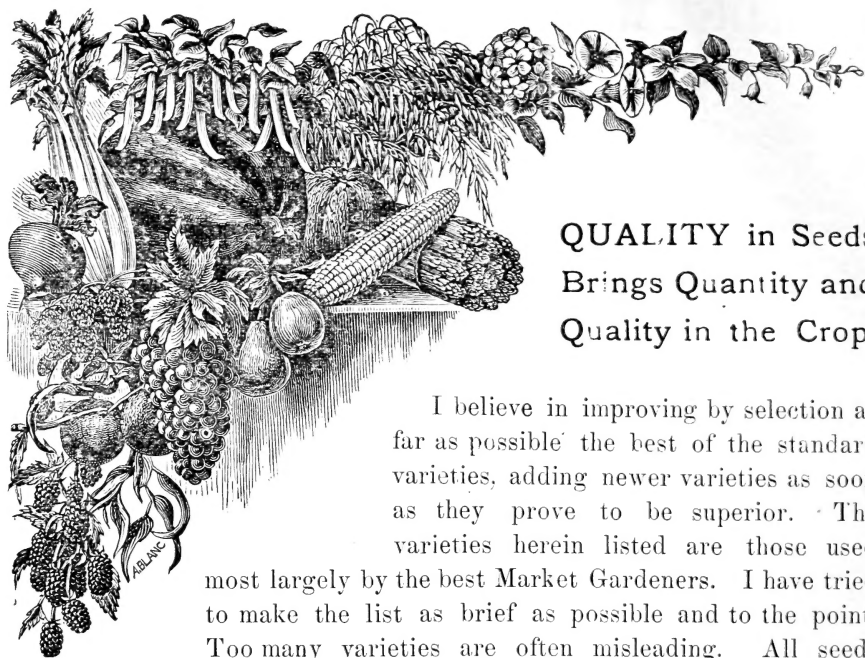

ELLSWORTH E. BURWELL,

160 BURWELL ST.

NEW HAVEN, CONN.

1905

Does Quality and Purity Count?

**QUALITY in Seeds
Brings Quantity and
Quality in the Crop.**

I believe in improving by selection as far as possible the best of the standard varieties, adding newer varieties as soon as they prove to be superior. The varieties herein listed are those used most largely by the best Market Gardeners. I have tried to make the list as brief as possible and to the point. Too many varieties are often misleading. All seeds offered by me have been grown and selected with the utmost care, to have all varieties pure and true to name.

AND I WILL GUARANTEE

that all seeds sold by me shall be as represented; should they prove otherwise, I will fill the order gratis. But I cannot guarantee more than this, or guarantee the crop in any way, as there are so many causes over which I have no control, that, let seeds be ever so fresh, weather and other circumstances may cause a total failure.

For many years I have made a specialty of Market Gardeners' Seeds, grown from selected seed stock. The importance of following this system for the production of choice vegetables is familiar to all gardeners; if the vegetable from which seeds are grown are inferior or impure, so will be their product. *Perfection of quality with me is of the first importance.*

I make no charge for packing. Bags charged at cost price only.

Half a bushel will be supplied at bushel rates; half a peck at peck rates; one-half pound at pound rates. Orders for less than one-half peck or one-quarter pound will be charged at quart and ounce prices.

When seeds are to be sent by mail, in larger quantities than packets and ounces, postage must be added at the rate of 8 cents per pound, or 15 cents per quart for Peas and Beans, and 10 cents for Corn.

GENERAL LIST

....OF....

SELECT VEGETABLE SEEDS

—FROM—

E. E. BURWELL,

160 Burwell Street,

NEW HAVEN, CONN.

ASPARAGUS

	Oz.	Lb.

Henderson's Early Snowball. The best and most reliable variety for either early or late planting, true stock20	2.00	7.75
Extra Early Dwarf Erfurt. Select stock.....	.20	2.00	7.50

CABBAGE

The Cabbage crop is one of the first in importance with the Market Gardener, and its success or failure is due in a large measure, to the seed used. The only consideration is "Where can the best seeds be procured?" To meet the demand made on us for this class of seed, we are paying special attention to its production, and to secure the best seed, we select fully developed heads, such as are absolutely perfect.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
Large Jersey Wakefield. The best, large early variety, <i>choice</i>25	.75	2.75
Burpee's All Head. The best for second early and very late planting. <i>Choice</i> stock25	.75	2.75

	Qt.	Bush.
Lawn Grass. Finest mixed. <i>Choice seed</i>	\$0.15	\$3.75

Burwell's Special Formula Fertilizers.

For all crops and soils, and mixed to order from best materials only.

At the earnest solicitation of my customers I have furnished them with my special mixtures for several years, and always (in favorable seasons) with the *very best satisfaction*. In buying *special* Fertilizers for your crops you are buying just the amount of plant food that that particular crop requires, *as near as can be calculated*, to carry it from start to finish; no more, no less. And right here is where "experience is the best teacher:" it *must* be in the right form to give best results.

BURWELL'S "FORMULA BB"

ANALYSIS

Nitrogen, Equal to Ammonia.....	4½ to 5½ per cent
Phos. Acid, Soluble and Available.....	10 to 12 per cent
Total Phos. Acid	12 to 13 per cent
Potash, Actual.....	5½ to 6½ per cent

This is my *special* Corn Fertilizer, also adapted to Grass, Grain Cabbage, Cucumbers, Squash, Onions, etc.

BURWELL'S "FORMULA AA"

ANALYSIS

Nitrogen, Equal to Ammonia.....	4 to 5 per cent
Phos. Acid, Soluble and Available....	.7 to 8 per cent
Total Phos. Acid.....	8 to 9 per cent
Potash, Actual	8 to 9 per cent

"Formula AA" is my *special* Potato Fertilizer, also adapted to Beets, Tomatoes, Radish, etc. Fertilizers also specially prepared for **Peas and Beans, Celery, Asparagus, etc.** My Formulas for these crops have been proven by experienced gardeners to give the very best satisfaction.

Dont pay Agents profits on your Fertilizers but have them mixed to order, and get just what you want. A well known brand of manufactured fertilizer analyzing 3 to 4 % Ammonia, 9 to 10 % Available Phos. Acid and 4 to 5 Actual Potash, and is selling as high as \$34.00 per ton by Agents, who pay \$30.00 in car lots, or \$28.00 spot cash for car load lots. It can be made for \$26.00 per ton or \$25.00 in quantity, and guaranteed. Is the difference worth saving? Why pay five dollars or more for the same grade of goods. I carry a good stock of all.

FERTILIZING MATERIALS and CHEMICALS

Special prices given on application, correspondence solicited.

PERSONAL ATTENTION

Given to all mail orders. I have also standard varieties of Flower Seeds, such as Mixed Sweet Peas, Nasturtiums, etc: Write me for prices on anything in my line you require. Thanking all for past favors, I respectfully ask for a continuance of the same.
